NARAYAN RAJ POKHREL

Software Developer | Machine Learning Enthusiast

narayanpokharel300@gmail.com | +977 9863325627 | Kathmandu, Nepal | linkedin.com/in/narayan-pokharel-467999215 | github.com/Narayan900

PROFESSIONAL SUMMARY

Software Developer with hands-on experience in Flutter app development, web development, and machine learning-based signal processing. Delivered production software and UI/UX design at a full-time role following a successful internship, while independently building an EEG-based brain-computer interface project. Skilled at combining technical development with clean design and clear communication to ship user-focused solutions.

EDUCATION

Bachelor of Electronics and Communication Engineering *Feb 2022 – Mar 2026*

Pokhara University (Nepal Engineering College), Bhaktapur, Nepal | CGPA: 3.26 / 4.00

EXPERIENCE

Junior Flutter Developer | Infotronex Technologies *Apr 2026 – Aug 2026*

Worked under the supervision of a senior developer on Flutter app and software development

- Assisted in developing and maintaining Flutter-based mobile applications under senior developer guidance.
- Contributed to software development tasks, gaining hands-on experience in a professional team environment.
- Supported debugging, feature implementation, and testing across app development projects.

Software Developer & Designer | Drone Hospital Nepal *Apr 2025 – Mar 2026*

Started as Software Developer & Designer Intern (Apr 2025 – Jun 2025), hired full-time thereafter

- Designed and developed software solutions, building and maintaining applications tailored to organizational needs.
- Created user-friendly UI/UX designs, ensuring seamless user experience across platforms.
- Collaborated with cross-functional teams to gather requirements, troubleshoot issues, and implement effective technical solutions.
- Maintained professionalism while providing technical support to clients and staff members.
- Built and delivered multiple Flutter mobile apps and websites for internal and client-facing use.

PROJECTS

EEG-Based Movement Classification System — Machine Learning Developer *2024 – 2025*

Final Year Project

- Processed and analyzed EEG signals using machine learning models for movement classification.
- Built a brain-computer interface (BCI) pipeline for real-time movement prediction.
- Designed a real-time assistive system for practical BCI-based applications.

SKILLS

- Flutter & Mobile App Development
- Web Development (HTML/CSS)
- Python & MATLAB Programming
- Machine Learning & Data Analysis
- EEG Signal Processing & BCI Systems
- UI/UX Design & Branding
- Problem Solving & Communication

CERTIFICATIONS

- Introduction to Prompt Engineering with GitHub Copilot — Microsoft / SimpliLearn SkillUp (Apr 2026)
- Gemini Certified Student — Google for Education
- Certificate of Participation — Nepal Engineering College, in association with e-Sewa
